Revisiting Medicaid Provider Payment Strategies During the COVID-19 Crisis

Manatt Health

September 17, 2020, 3:30 – 4:30 PM ET

A grantee of the Robert Wood Johnson Foundation

www.shvs.org
About State Health and Value Strategies

State Health and Value Strategies (SHVS) assists states in their efforts to transform health and health care by providing targeted technical assistance to state officials and agencies. The program is a grantee of the Robert Wood Johnson Foundation, led by staff at Princeton University’s School of Public and International Affairs. The program connects states with experts and peers to undertake health care transformation initiatives. By engaging state officials, the program provides lessons learned, highlights successful strategies, and brings together states with experts in the field. Learn more at www.shvs.org.

Housekeeping Details

All participant lines are muted. If at any time you would like to submit a question, please use the Q&A box at the bottom right of your screen.

After the webinar, the slides and a recording will be available at www.shvs.org.
COVID-19 Resources for States

State Health and Value Strategies has created an accessible one-stop source of COVID-19 information for states at www.shvs.org/covid19/. The webpage is designed to support states seeking to make coverage and essential services available to all of their residents, especially high-risk and vulnerable people, during the COVID-19 pandemic.
About Manatt Health

Manatt Health, a division of Manatt, Phelps & Phillips, LLP, is an integrated legal and consulting practice with over 90 professionals in nine locations across the country. Manatt Health supports states, providers, and insurers with understanding and navigating the complex and rapidly evolving health care policy and regulatory landscape. Manatt Health brings deep subject matter expertise to its clients, helping them expand coverage, increase access, and create new ways of organizing, paying for, and delivering care. For more information, visit www.manatt.com/ManattHealth.aspx
Agenda

- Context: Provider Challenges and Federal/State Response
- Medicaid Managed Care Strategies
- Medicaid Fee-for-Service Strategies
- Discussion
Context: Provider Challenges and Federal/State Response
COVID-19 Has Dramatically Impacted Financial Stability of Providers

**Hospitals**
- Experienced lost revenue from cancelled elective procedure and emergency department/outpatient visits, and higher costs related to COVID-19 (e.g., surge planning, procurement of PPE, increased staffing costs, etc.)
- Even after accounting for federal support, hospital margins are estimated to be -7% in the second half of 2020, compared to 3.5% in 2019, according to one analysis.

**Other Providers**
- Outpatient visits fell by 60% in mid-April and are still 10% lower compared to a pre COVID-19 baseline, even after accounting for increased telemedicine visits

States are Implementing Medicaid Payment Strategies to Supplement Federal Stimulus Funds

**Federally-Driven Strategies**

- **Federal stimulus bills,**¹ which provided supplemental funding to states, local governments, and providers, including $150 billion Coronavirus Relief Fund for states and $175 billion Provider Relief Fund

**State-Driven Strategies**

- Dozens of states have implemented Medicaid payment increases through disaster relief state plan amendments, appendix K (for home and community based service providers), and managed care
- This presentation focuses on innovative payment strategies states can continue to take in managed care and FFS to sustain providers during the public health emergency

---

¹ As of April 21, 2020: H.R. 266, Paycheck Protection Program and Health Care Enhancement Act; H.R. 748, the Coronavirus Aid, Relief, and Economic Security Act (CARES Act); H.R. 6201, Families First Coronavirus Response Act; H.R. 6074, Coronavirus Preparedness and Response Supplemental Appropriations Act, 2020

**Focus of this presentation**

Medicaid Managed Care Strategies
Background: CMS’s May Guidance Provides New Managed Care Payment Flexibilities During Public Health Emergency

Directed Payments

Guidance gives states new flexibility to implement managed care directed payments, including:

- **Higher limits on per-service payment levels.** CMS has previously used the average commercial rate (ACR) as a ceiling on directed payment arrangements. During the pandemic, CMS will evaluate directed payments to ensure providers will not receive total payments that exceed what was assumed in capitation rates absent the public health emergency. Capitation rates assumed normal utilization levels, so spreading the same dollars across sharply lower utilization may mean that, on a per-service basis, payments are considerably higher than the ACR.

- **Retroactive implementation of directed payments.** Directed payments must be tied to utilization, but CMS’s guidance confirmed that directed payments can be made retroactively based on services delivered by a group of providers back to the beginning of the rate year. As a result, states can implement directed payments mid-rate year as a tool to address provider shortfalls, depending on how COVID-19 continues to impact provider utilization and payment levels.

States are required to establish a two-sided risk corridor on their Medicaid managed care rates as a condition for CMS approval of the directed payment, and must also submit a preprint and contract amendment. CMS will not require a rate amendment if payment amounts are de minimus (less than 1.5 percent per rate cell).

Based on CMS guidance, states are implementing a variety of strategies to increase managed care payments to providers. States that have not yet adopted directed payment strategies can do so for duration of public health emergency.

1 As of August 26, 2020: H.R. 266, Paycheck Protection Program and Health Care Enhancement Act; H.R. 748, the Coronavirus Aid, Relief, and Economic Security Act (CARES Act); H.R. 6201, Families First Coronavirus Response Act; H.R. 6074, Coronavirus Preparedness and Response Supplemental Appropriations Act, 2020
### Make Directed Payments to Providers to Match Historical Payment Levels

<table>
<thead>
<tr>
<th>How It Works*</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>A. Identify applicable provider class</strong> to receive directed payment</td>
<td>Community-based behavioral health providers</td>
</tr>
<tr>
<td><strong>B. Identify providers’ monthly Medicaid payments from the most recent year pre-COVID 19</strong></td>
<td>$100</td>
</tr>
<tr>
<td><strong>C. On a monthly basis, calculate actual MCO utilization and payments to provider class</strong></td>
<td>$50; 10 units of service</td>
</tr>
<tr>
<td><strong>D. Subtract historical monthly payments (Step B) from actual payments (Step C) to identify payment gap</strong></td>
<td>$100-$50=$50</td>
</tr>
<tr>
<td><strong>E. Divide payment gap (Step D) by actual units of service (Step C) to identify per-service directed payment increase</strong></td>
<td>$50/10=$5</td>
</tr>
<tr>
<td><strong>F. Direct MCOs to increase per-service directed payments by the amount identified in Step E based on actual utilization</strong></td>
<td>$5*10=$50 in increased payments is added on to the $50 they already received</td>
</tr>
</tbody>
</table>

*Note: *Represents one directed payment approach. States are implementing a wide array of directed payments based on federal directed payment regulations (42 CFR 438.6(c) and COVID-19 directed payment guidance; see next slide)
## Make Directed Payments to Providers to Match Historical Payment Levels: State Examples

<table>
<thead>
<tr>
<th>Managed Care</th>
<th>Fee-for-Service</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Virginia</strong></td>
<td><strong>New Hampshire</strong></td>
</tr>
<tr>
<td>- Increased per-service reimbursement for many primary care services (evaluation and management codes) by 29% between March - June 2020</td>
<td>- Took ~1.5 percent of its capitation payments from September 1, 2019 through June 30, 2020 and required MCOs to distribute them to six distinct provider classes¹</td>
</tr>
<tr>
<td>- Directed payment designed to ensure dollars built into capitation rates for primary care services reach providers despite lower than expected utilization</td>
<td>- The directed payment is structured as a uniform percentage increase for each provider class (percentage differs by class)</td>
</tr>
<tr>
<td>- Virginia Department of Medical Assistance Services estimates directed payment will increase payments for primary care services by $30 million</td>
<td>- Even though the directed payment was not approved until April 2020, it was retroactive to Sept. 2019</td>
</tr>
</tbody>
</table>

---

¹ Six provider classes: critical access hospitals; residential substance use disorder providers; home health care providers; private duty nursing providers; personal care providers; federally qualified health centers and rural health centers.

Encourage Plans to Increase Payments to Providers with Declining Utilization

**How It Works**

- Request that plans pay providers at levels similar to the prior year’s payments, regardless of actual utilization
  - *For example, request that plans pay behavioral health providers 1/12 of last year’s total payments each month*

- To support plans’ efforts to maintain adequate provider networks, states could:
  - Make incentive payments to plans based on the parameters in 42 CFR 438.6(b) (up to 5% above the actuarially sound capitation rates)
  - Increase capitation rates by up to 1.5% without triggering need for new rate certification; contract amendment needed

**Considerations**

- State can point to the need to maintain network adequacy and meet MLR requirements
- Governmental managed care plans may be more willing to pay providers regardless of utilization
- To implement an incentive arrangement, states would need to amend their contracts with plans and submit to CMS for approval

**Authority**

CMS approval of contract amendment (needed only for approval of new incentive arrangement and/or capitation rate increases)

**State Example: Washington**

- Worked with MCOs to develop voluntary payment “stabilization” arrangements for financially distressed behavioral health providers

Considerations

- Current federal regulations strictly limit the use of pass-through payments (see 42 CFR 438.6(d)), but CMS’s proposed 2018 managed care rule opens the door to exceptions.
- State could request that CMS grant the ability to make pass-through payments on a temporary basis (e.g. for duration of the National Emergency) based on a methodology approved by CMS under Medicaid fee-for-service (e.g. UPL payment methodologies)
- CMS has not approved any pass-through payment requests to date; however, similar outcome can be achieved through new flexibilities related to directed payments

Authority

1115 waiver
Medicaid Fee-for-Service Strategies*

*Strategies that follow are in addition to traditional tools states are using to increase provider reimbursement (e.g. across-the-board rate increases, maximizing supplemental payments based on state’s existing FFS supplemental payment methodology, etc.)
Make Advanced, Interim Payments to Providers with Subsequent Reconciliation

How It Works

State makes interim, advanced payments based on provider’s historical claims volume before COVID-19

Provider receives interim payment amount and continues to submit claims for services rendered

State performs reconciliation at later date by comparing advance payments with actual claims submitted to identify provider overpayment

State Medicaid agency repays federal share of any overpayment to CMS

Provider repays state Medicaid agency for any overpayment (over time; not necessarily single payment)

Applicable Provider Class
All Providers

Authority
State Plan Amendment

Considerations
- Unlike other strategies, payment would be a loan. However, offers a quick funding stream for short-term cash flow needs
- Could be paired with other funding mechanisms

State Example: North Carolina
- Any Medicaid provider that requests can receive advanced, interim payments

**Managed Care**

### How It Works*

<table>
<thead>
<tr>
<th>Step</th>
<th>Description</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>A.</td>
<td>Identify applicable provider class to receive payment increase</td>
<td>Community-based behavioral health providers</td>
</tr>
<tr>
<td>B.</td>
<td>Identify providers’ average Medicaid service payments and total utilization for a six-month period pre-COVID 19</td>
<td>$10/per unit of service; 10 units for a total payment of $100</td>
</tr>
<tr>
<td>C.</td>
<td>Identify actual utilization between March-August 2020 (6-month COVID 19 period)</td>
<td>8 units of service</td>
</tr>
<tr>
<td>D.</td>
<td>Identify percent change in utilization pre (Step B) and post (Step C) COVID 19</td>
<td>(10-8)/8 = 25%</td>
</tr>
<tr>
<td>E.</td>
<td>Increase rates by percent change identified in Step D</td>
<td>25%</td>
</tr>
<tr>
<td>F.</td>
<td>Assuming post-COVID 19 utilization in subsequent months is similar to March-August 2020, total payments will approximate pre-COVID payment levels</td>
<td>8 units of service * $12.50 per unit (original $10 rate increased by 25%) = $100</td>
</tr>
</tbody>
</table>

---

### Fee-for-Service

### Applicable Provider Class

- Non-Institutional Providers (not subject to UPL)

### Authority

- State Plan Amendment

### Considerations

- **For providers not subject to a UPL, CMS has discretion to approve payments based on principles of economy, efficiency and quality of care.**
- **CMS may be more likely to approve a cost-based methodology.** Non-institutional providers, however, may not have reliable cost data, in which case the state could propose using aggregate payments.

---

*Note: Represents one approach to maintaining historical payment levels for non-institutional providers. States have a wide array of options for increasing Medicaid FFS rates to providers.*
For Institutional Providers Subject to UPL, Adjust UPL Calculation to Preserve Aggregate Payment Levels

**Managed Care**

**How It Works**

<table>
<thead>
<tr>
<th>Standard 2020 UPL Calculation</th>
<th>Proposed 2020 UPL Calculation</th>
</tr>
</thead>
<tbody>
<tr>
<td>UPL Cap Based on <strong>2019</strong> Medicare data</td>
<td>UPL Cap Based on <strong>2019</strong> Medicare data</td>
</tr>
<tr>
<td>Supplemental Payment</td>
<td>Supplemental Payment</td>
</tr>
<tr>
<td>Medicaid FFS Claims Based on <strong>2019</strong> Medicaid data</td>
<td>Medicaid FFS Claims Calculated using <strong>2020</strong> actual/projected “COVID-level” utilization</td>
</tr>
</tbody>
</table>

*To maximize UPL room, use last year’s UPL cap and this year’s lower, COVID-level FFS claims*

**Fee-for-Service**

**Applicable Provider Class**

Hospitals, Nursing Facilities and/or ICFs/IIDs (providers subject to upper payment limits at 42 CFR 447.272)

**Authority**

State Plan Amendment

**Considerations**

- May want to revisit distribution of UPL payments to ensure appropriate targeting based on provider needs

**State Example**

- **North Carolina** is implementing a supplemental payment to ensure aggregate monthly inpatient Medicaid payments between March - June 2020 approximate monthly payment levels prior to the public health emergency

Discussion

The slides and a recording of the webinar will be available at www.shvs.org after the webinar
